Antievent Clashinator

Project done by
Pranava Vedagnya Gaddam
Arunakiran Mahadevamangalam
Divya Soni
Lakshya Jalan

For the academic year 2022-23

Introduction

Brief points on the idea for the project

01   Club activities in the institution

02   Active event conduction by clubs

**03**   Huge participation

04   Issue - events clashing

05   Issue - hard to discover events

06   Need an organised solution

Problem Statement

The problem of

hastily planned on-campus events with clashing schedules

affects

Clubs and organizations on campus

the impact of which is

clubs missing out on substantial participation for their event

a successful solution would be

A centralized scheduling and advertising platform, which the clubs can use to make informed decisions about their events, and also to attract more participation from students.

Problem
Statement

The problem of

lack of a straightforward way to find out about all club activities and events happening on the campus.

affects

all students who are interested in taking part in these events.

the impact of which is

students missing out on events that they would've otherwise wanted to attend

a successful solution would be

a centralized platform pooling in information about all events scheduled in the future, so that the students are able to make a more informed decision.
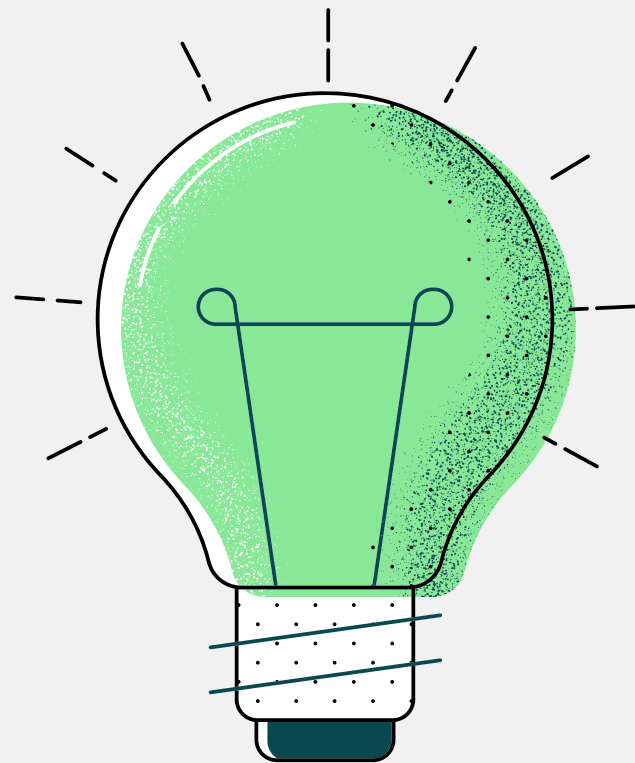

Vision

A calendar based appliation

which shows the students events being conducted on a particular day. Logging in gives more freedom to the student, to go through his/her class schedule, exams.

Scope

The application will provide a client-based personalized service for a logged in user and a generalised perspective to a non-logged in user.

AECI will allow the user to access the details of all the curricular, and co-curricular events happening on the campus. They will also be able to register for these events, as well as access information about all the clubs and associations operating in the college. With this overview, they will be able to better schedule their time while in college.

Stakeholders

Developers

Will implement the application

Divya Soni, Pranava Vedagnya

Designer

Will design the user workflow

Arunakiran Mahadevamangalam

Project Manager

Will handle the overall design

Lakshya Jalan

End users

Student
Primary end user

self stakeholder

Explore events and clubs, register for events

Admin
Primary End user

self stakeholder

Oversee the events going on within the software.

Club representative
Primary End user

self stakeholder

Maintain the events related to the particular club up to date.

Student representative
Primary End user

self stakeholder

Maintain the timings related to classes and exams up to date.

Features

Seamless Event Planning

Clubs have access to schedules of all upcoming events on campus, which would lead them to plan their event in an efficient manner.
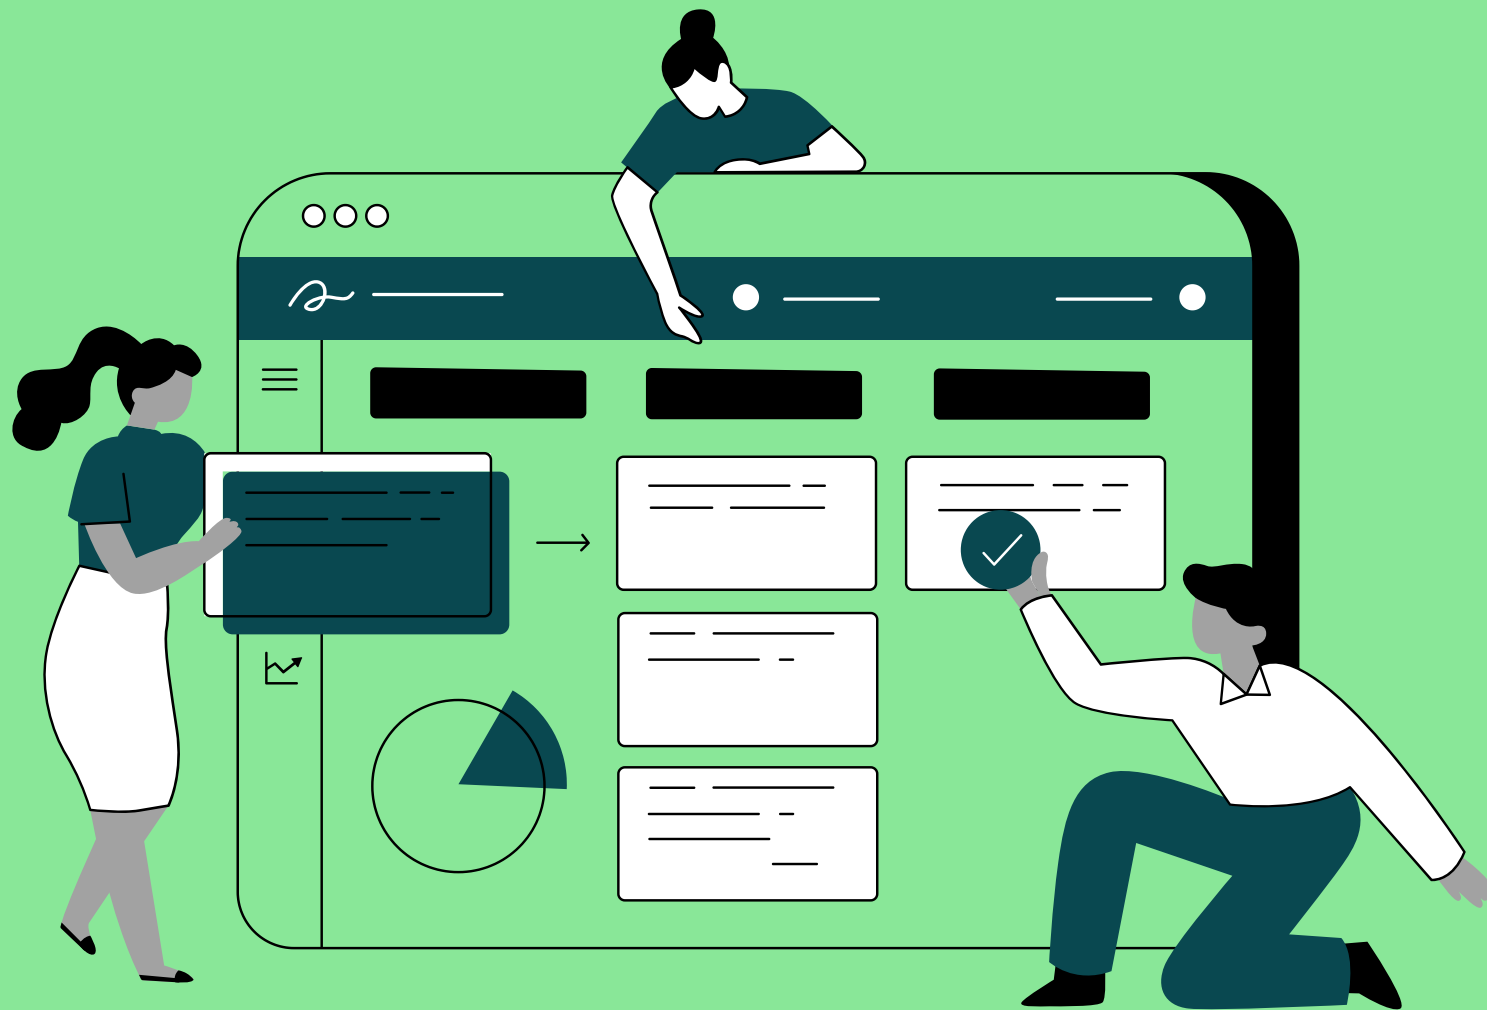

A one-stop platform for event discovery

The portal would consolidate all events happening on campus, making it easier for students to know what is happening in the college.

Easy Registrations

The platform will also allow a one-click registration process, which would remove the hassle of filling repetitive G-Forms for every event.

01

Student

1. Look up events on campus
2. Simplified registration for events
3. Unregister for events
4. Find information about clubs
5. Apply for clubs

02

Student representative

6. Add exam schedules
7. Add class schedules
8. Update cancelled classes

03

Club Representative

9. Add/edit information about clubs
10. Add/edit events coming up
11. Promote events
12. Track registrations for events
13. Make announcements about the events
14. Archive events information

04

College Administrator

15. Monitor all student/club activities
16. Manage club representatives

Use cases

THANK YOU
